Moreton Bay Boys College Science Club

Term 4 2010
Fee - $100
Time – Thursdays (3.00-4.30pm)
Where – Junior Science Room

Session 1 – Thursday 7th October
FIBER FEVER – Fibre production is a fast growing industry in Australia. Children will examine different types of fibre and discover some of their properties and how they may be used.

Session 2 – Thursday 21st October
HOT STUFF! – What do we mean by ‘hot’ and ‘cold’? Investigating heat energy, how it is generated and how we use it.

Session 3 – Thursday 4th November
INERTIA -Do you have too much inertia to get out of bed? – Things like to keep doing what they are already doing. They do not like to start moving or to stop moving. They are ‘lazy’ – Newton’s First Law of Motion.

Session 4 – Thursday 18th November
KITES – Discovering the science of kites. The kite depends on the wind and the kite line to give it lift. The kite line keeps the kite relatively still while the air rushes past. Kites fly when there is a balance between shape, wind and the angle the kite presents to the wind.

****Session 5 – Wednesday 1st December
HIGHLIGHTS and FAVOURITES - The ‘best’ experiments followed by a break up party.

Moreton Bay Boys College Science Club
Please return this slip to Donna Bennett before Session 1. (Do not return this to the school)
