Things are changing — explaining puberty to your Year 5 and 6 son

WHEN: Thursday 22 November, 6.30 pm
WHERE: MBBC Lecture Theatre

Puberty is a special, yet very challenging stage of life that every young person must travel through. It is a time when our family relationships are challenged and redefined, but it is also a time when our boys need their families and especially the influence of their fathers or good male role models as they make the transition from boys to men.

All boys in Years 5 and 6, their fathers or significant males are invited to come along to this very important information night. During the evening, we will watch an informative DVD together and then go through a student and parent workbook that can encourage further discussions at home.

Hosted by Mr McCarthy.

Families who are unable to attend, the DVD and workbooks will be sent home the day after the presentation.
